Working in Partnership with our Customers.

At b2b Secure IT our commitment to our customer is simple; we will provide an unrivalled end to end electronic security service and solutions, working tirelessly to ensure we react to our client's individual requirements.

Specialists in:

SECURITY SYSTEMS | ELECTRICAL SYSTEMS | FIRE SYSTEMS
DATA SYSTEMS | DOOR ENTRY | MAINTENANCE & SUPPORT
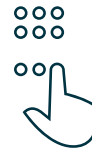

![b2bsecure it logo]

B2B Secure IT now has over 10 years' experience in the provision of specialist electronic security service and solutions to a diverse range of customers.

Due to continual growth and development, the company restructured recently to separate from the b2b smarter group and become an incorporated limited company which has continued to grow and expand by enhancing their service platform and staffing provision to meet the demands of both the local market and customers throughout the United Kingdom.

Our Combined Services

SECURITY SYSTEMS
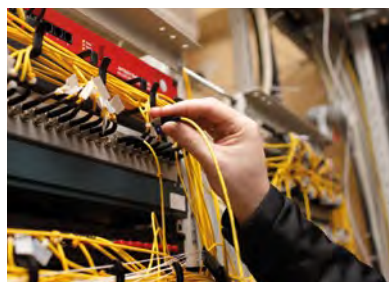

ELECTRICAL SYSTEMS

FIRE SYSTEMS

DATA SYSTEMS

DOOR ENTRY

MAINTENANCE & SUPPORT

B2B Secure IT Ltd specialise in commercial and industrial electronic security solutions for public, private, national and international clients.

The company currently offers all customers a complete security system and solution specific to their business, home or property needs. We pride ourselves on our ability to offer and provide fully integrated advanced surveillance and monitoring security systems, comprising of solution consultation and design, installation, commissioning, maintenance and monitoring.

"Excellent – Very kind and thorough operation. Explained the problem and once they had approval, proceeded to fix the problem"

John Gray

"Very satisfied, pity more companies don't operate with the same high standards"

Danny Wilson

"Excellent solutions and any concerns or issues are taken very seriously and dealt with promptly."

Paul Vernon

"It gave us complete peace of mind that our business was not only more secure but was also being looked after when no-one was on-site."

John Bullen

"Very prompt and professional service."

Home User

Security Systems

- Bespoke security and monitoring solutions
- Cost saving initiatives
- Customised response and escalation
- High quality digital records of all activity
- Audit trails of activations with time/date stamps

Solution Integration

b2B Secure it is at theforefrontof solution integration for your CCTV, Intruder, Access Control, Fire, Intruder Detection and Data systems via our software offering the client a Graphical User Interface (GUI) providing:

Immediate Information

Video capture / storage

Email

Alarm escalation

CCTV Solutions

Using Intelligent Integrated Analogue and IP systems with remote monitoring capability. CCTV is now the cornerstone of our business model and service provision. We consider it an essential part of any security solution to combat crime, improve detection and escalate/respond appropriately to assist and support the apprehension and prosecution of offenders.
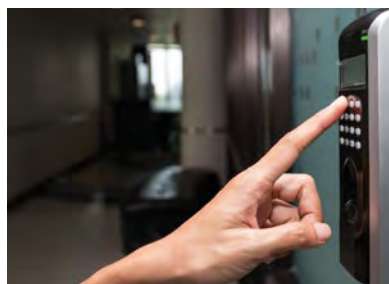

Audio, Voice-Over Capabilities

Various transmission methods such as Copper, Fibre Broadband, Wireless Systems and Satellite Communications

Pre-Planned Maintenance including all operational aspects of the camera system, data storage and hardware
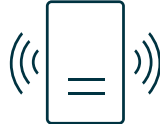

Reactive Maintenance – 4 hours response

Verbal and physical technical advice and support

Security Systems

An experienced and professional team of experts provide the support & backup required to ensure each project is completed on time & budget.

Intruder Alarm Systems

We provide a unique and specialist service in the design, installation, commissioning and servicing of both small intruder alarm systems to large Perimeter Intruder Detection (PID) systems. All systems installed will fully comply with BS8243, PD6662, EN5013-1, BSEN ISO 9001:2000 and the National Security Inspectorate (NSI) NACOSS Codes of Practice along with PSA 2006_12 and NSAI I.S. EN50131-1:2006, S.R. 40:2005. All of our solutions are designed to meet customer's specific requirements activating a police response through the monitoring centre.

Data Systems

B2B SecureIt Data Networks can provide network installations for home, office and large multiple sites. We can also provide integrated solutions for voice and data. The systems we install include CAT5, CAT5e, CAT6 and fibre-optic networks. These networks can be provided for domestic, retail and commercial applications. The systems are installed in rack-mounted cabinets complete with network hardware as required.

Fibre Optic and Structured Cabling

As part of the installation of IP security systems we can install and test all ranges of fibre optic and structured cabling installations to meet the needs of the site or client requirements.

Our structured cabling service offers the following:

Design Services

Project Management

Cable Repairs

Fault Finding & Diagnosis

Enclosed Cabling Installation

Patch Cable Installations

Our fibre optic services help us provide a complete in house system without the need for third party contractors. Our services include:

Internal and External installations

System Design

Project Management

Multimode cable (OM1, OM2 and OM3)

Singlemode cable (OS1 and OS2)
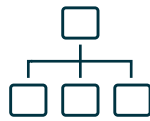

Internal, External and Universal sheath options

ST, SC, MT-RJ, LC Terminations

Data Systems

We have a vast experience in the design and installationof data and telecommunications networks with our partner group B2B Smarter. Integrated solutions are provided, which allow interconnection of different systems via Fibre optic backbone into a managed data network solution for large campus installations.
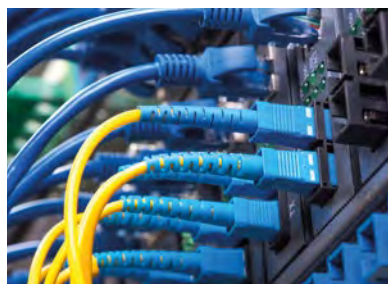

Wired Networks

B2B Data Networks can provide wired networks for both CAT 5E and CAT 6. The networks involve the installation of data points at locations around the building, routed back to a central commscabinet within the recognised transmission distance.

Wireless Networks

Wireless networks provide an easily connected communications system for home, office and retail environments.They are ideal for situations where numerous people need to access anetwork from a variety of devices.

Maintenance & Support

B2B Secure IT offers unrivalled maintenance & support for all the systems we provide.

Planned & Reactive Remedial Maintenance

Our preventative maintenance contract ensures that your security system remains in full working order and that upgrades are implemented in a structured and coordinated way. We successfully complete 100% of our scheduled maintenance visits on-time.

Care Systems

Following the take-over of your maintenance contract the details of the system are entered ontoour central database. B2B team of field engineers located throughout the country are linked to this database at all times via hand-held PDA's which gives them all the information they need to know about your system on-the-spot such as its specification, technical drawings, service history and maintenance schedule.
